## Analysis Findings

### REPUTATION CHECKS

- Known security testing domain (Cisco (OpenDNS) security test domain). This site is intentionally flagged as dangerous for security product testing.
- Domain established 20 years
- SSL issue: Certificate verification failed: [SSL: CERTIFICATE\_VERIFY\_FAILED] certificate verify failed: unable to get local issuer certificate (
- Clean on all blocklists
- Page fetch: Connection failed

### CONTENT ANALYSIS

- Known security testing domain intentionally flagged by Cisco OpenDNS for product testing purposes
- Domain established 20 years ago with legitimate history
- Clean on all blocklists despite intentional security test designation
- SSL certificate issue is expected for a testing domain and does not indicate malicious intent
- Connection failure is consistent with a dedicated security testing domain that may have limited accessibility

### RISK FACTORS

 SSL certificate issue

## Verdict History

**Safe** Apr 6, 2026 at 10:40 AM

Risk 25/100 · HIGH · Tier 1

**Unknown** Apr 6, 2026 at 10:01 AM

Risk 25/100 · LOW · Tier 2
